

# MULTIBENCH

Structural Repair Workstation

## POWERFUL

The Multibench employs an electro-hydraulic lift suitable for lifting most vehicles, with a maximum lifting capacity of 7,000 lbs to a height of over 4' 9". Technicians have the ability to work on vehicles at a comfortable height during the repair process.

## LOW-PROFILE AND SMALL FOOTPRINT

Platforms sit flat on the ground to enable vehicles with limited ground clearance to easily drive onto the lift. A small footprint allows facilities of all sizes to place the Multibench in repair bays that cannot accommodate full size benches.

## DIAGNOSTICS AND REPAIR

The pulling column provides 10 ton pulling capacity for serious vehicle straightening, 360° around the vehicle. Combined with the Touch electronic measuring system (optional), the Multibench is a single bay solution to repair vehicle damage.

VOLTAGE	208/230V
LIFTING CAPACITY	7,000 lbs
LIFTING HEIGHT	4' 9"
LIFT TIME (ASCENSION)	45 seconds
PULLING FORCE	10 ton
